			discussed the discipline strands at each grade level. The committee discussed that each of the subdomains (civics, economics, geography, history and inquiry) need to be the focus of the blueprint. Social studies is an integrated discipline so making sure all subdomains are assessed is essential. Inquiry and content are not separated, but linked together.
12:00pm	Lunch		
1:10pm	Review Assessment Blueprints (Review Public Comments and Draft Proposed Blueprints)	Lauren Gallicchio	Groups continued work to work in the grade band advisory panels to review and address public comments on the draft blueprint.
	Pulse Check	Lauren Gallicchio	<p>Each grade band advisory panel shared the progress of their work with the whole group. Groups reported they were finished with the review of public comments and drafted the proposed blueprint.</p> <p>All groups (elementary, middle and high) agreed that each discipline strand subdomain (civics, economics, geography and history) should be 25%. In addition, they agreed that inquiry should be 50%, meaning that 50% of the discipline strand subdomains would have 50% of the questions that were inquiry. The committee determined that the draft blueprint aligned with the <i>Kentucky Academic Standards (KAS) for Social Studies</i>, as required per SB 1 (2017).</p> <p>The high school AP drafted an additional footnote to include with the high school blue print. They determined that the HS blueprint will have a footnote when it refers to the history subdomain to ensure that both U.S. History and World History are included in the 25%.</p>
	Close of Meeting	Lauren Gallicchio	<p>Meeting Adjourned</p> <p>Whitney Walker motioned to adjourn the meeting. Kendra Childress seconded the motion. All members were in favor.</p>
