

Science 11 D Deer and Wolves Animation

Part 1

There is a group of deer running together in the same direction. A single wolf is chasing the deer. The deer run off screen; the wolf never catches up to the deer and the wolf eventually stops.

Part 2

There is a group of deer running together in the same direction. A pack of wolves is chasing the deer. As the deer run, the wolves are able to run faster to surround one deer, as the remaining herd runs off screen.
