

Communicable Disease

This new Communicable Disease Tab allows school nurses to document each time the local health department or other medical providers are notified of a reportable communicable disease in the school. Having this documentation in a specific location will allow school nurses to easily track any and all reported illnesses.

To access the new Communicable Disease tab, user access must be granted by your district system administrator.

Status Date and Status Time: Fields are auto populated with current date and time but must be unique for a student. When saving the record, if you receive this error message: “A record already exists for this Date and Time. Click “OK” to go back and enter a new Date and/or Time.” then increase the Status Time by 1 minute and try to save again.

Reported Date: Enter date when the communicable disease was reported.

Communicable Disease: Select the communicable disease from the list. This list is also searchable. You can start typing either the ICD10 code or the disease name.

Health Department Notified: Mark the check box after the Health Department has been notified.

Save: Click the save button once the information has been entered.
