KENTUCKY K-12 ANNUAL
COMPUTER SCIENCE
REPORT 2022

Introduction to the 2022
K-12 Computer Science Report

SB 193 (2020) establishes a requirement for the Department of Education to submit an annual report on public school students participating in computer science courses. The subsequent landscape report will gather relevant policy, student participation, and teacher development metrics and use them to further define, clarify and redirect ongoing state planning efforts.

This inter-office collaboration by the Kentucky Department of Education (KDE) seeks to not only provide information on current implementations but also guide future efforts to equitably provide access to Computer Science courses to all K-12 students and guides our strategies to achieve the goals outlined in our Comprehensive Computer Science Plan.

The Kentucky K-12 Computer Science Plan, as well as the respective standards, is designed to direct the efforts of Computer Science programming and oversight in three categorical areas:

<Think CS>
Stakeholders come together and define a community-specific strategy to embed CS work in schools

<Learn CS>
Train and equip teachers with relevant and rigorous PD to be able to provide meaningful CS learning opportunities for students aligned with the state CS strategies

<Do CS>
Provide ALL students the opportunity to apply learning in authentic application of their CS knowledge.

All three of these categories were identified as target domains based on prior-year CS Reporting data and are essential for an effective district-by-district CS strategy. With the focus on these areas, it is the hope that equitable access to high-quality computer science education can be provided to each and every student in the Commonwealth.

Kentucky's Progress on Code.org's 9 Policies to Make CS Fundamental

Establish rigorous K–12 computer science standards.	YES	Create programs at institutions of higher education to offer computer science to preservice teachers.	NO	Allow computer science to satisfy a core graduation requirement. **YES**
Create a state plan for K–12 computer science.	YES	Implement clear certification pathways for computer science teachers.	YES	Require that all secondary schools offer computer science. **NO**
Allocate funding for teacher professional learning and support.	YES	Establish dedicated computer science positions in state and local education agencies.	YES	Allow computer science to satisfy an admission requirement at institutions of higher education. **YES**
