

Define OneRoster 1.2 connection to Identity Automation

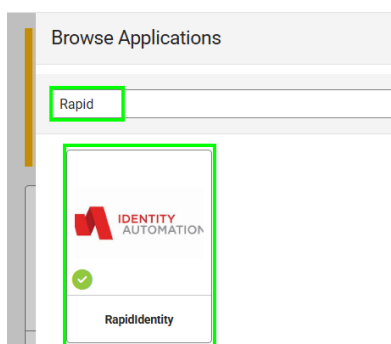

Last Modified on 6/16/2025

Tool Search: Digital Learning Applications Configuration

If a **RapidIdentity** connection with the Identity Automation logo does not exist, select Add Application. Type **Rapid** in the Search bar to filter the supported connection tiles.

Digital Learning Applications Configuration

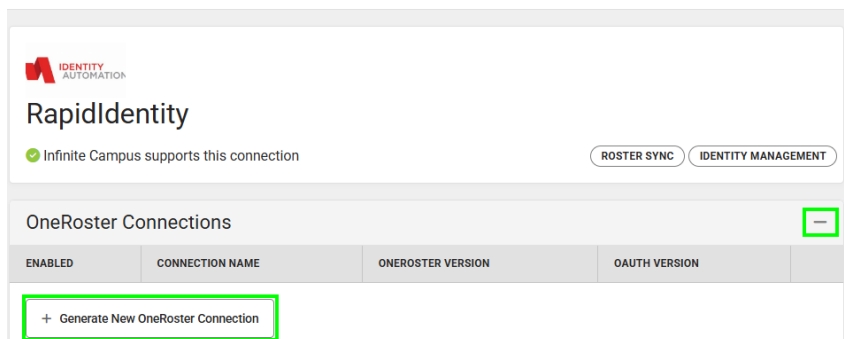

Select the **RapidIdentity** tile.

Digital Learning Applications Configuration

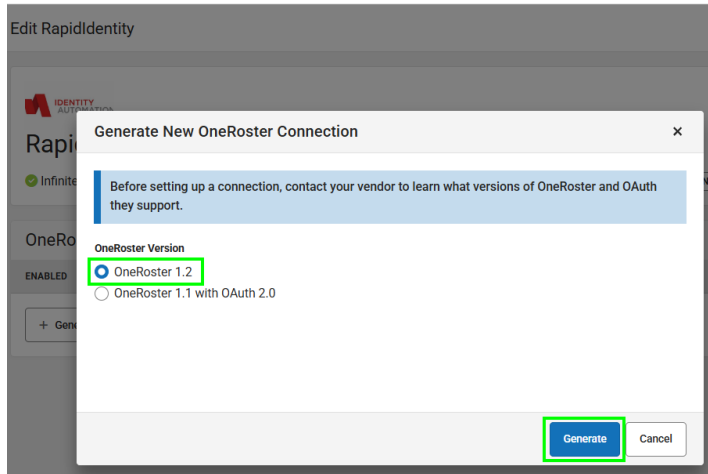

Edit RapidIdentity

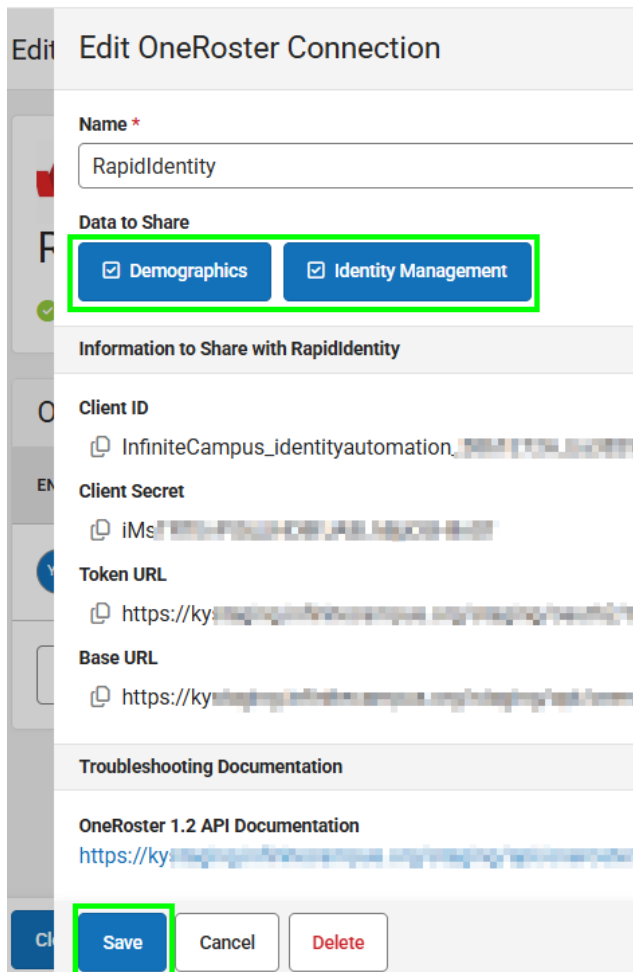

Expand OneRoster Connections, then select **Generate New OneRoster Connection**.

Digital Learning Applications Configuration

The CUES project requires **OneRoster 1.2**. Select **Generate**.

Digital Learning Applications Configuration

Ensure that both **Demographics** and **Identity Management** are checked.

Submit the **Information to Share** to Identity Automation via [CUES Infinite Campus Information](#). Select **Save**, then **Close**.

See the [OneRoster API article](#) and the [Configuring OneRoster Connections article](#) for additional information.

Exclude data from being sent via OneRoster

If desired, data can be excluded from all OneRoster API connections by using the **External LMS Exclude** option.

School Information ☆ [School & District Settings](#) > [Schools](#) > School Information

[Save School](#) [Delete School](#)

School data is divided into two areas: School Detail and School History. School History records contain information related to a school that can be tracked historically. By creating a new School History, the new information is tracked as of a specific date while the previous values are preserved. To create a new School History record, select an existing School History and click the New School History button. This will create a new School History record based on the current information, which can be modified as needed and saved.

- Jefferson Middle School

School Detail

*Name

District Office

NCES School Number

Standard Code (SIF StatePrId)

State Classification

Course Catalog - Master List

*Location Number

000

*Type

02: Special Education School

CEEB Number

External LMS Exclude

☒

Set the **External LMS Exclude** indicator at the highest applicable level as it applies to all records below it in the hierarchy. For example, if a school is used to track homeschool students setting **External LMS Exclude** on the school will prevent all calendars, courses and enrollments in that school from being sent via OneRoster API. See the [External LMS Exclude \(Digital Learning Applications\) article](#) for more information.
