Include all Staff in the OneRoster output

Tool Search: District Assignment

It is not possible to include non-teaching staff in the OneRoster 1.2 connection for CUES without impacting OneRoster 1.1 connections for other applications. The non-teaching District Assignment roles define staff as Administrator in OneRoster 1.1. The Program role should not be checked for all staff.

Schedule One Time Job to Unassign Program Role on District Assignment

Tool Search: Task Scheduler

If a task was created to ensure all staff were included in the OneRoster file for RapidIdentity, it needs to be reversed.

The screenshot shows a 'Scheduled Task Detail' form with the following fields and values:

- Name: (Required)**: CUES - Set Program on All District Assignments
- Stop/Pause Execution**: ☐
- Start Date/Time (Required)**: 08/27/2026 07:25 PM
- Recurring Frequency**: Daily
- Tool Code**: (empty)
- Task Type: (Required)**: SQL Script
- Command to run**:

```
UPDATE EmploymentAssignment
SET program = 1, [modifiedByID] = NULL, [modifiedDate] = GETDATE()
WHERE program = 0
```

Name: CUES - Set Program on All District Assignments

Stop/Pause Execution: Unchecked

Start Date/Time: Select today's date and a time that is after school but before 9:30 PM

Recurring Frequency: Select Daily to update new staff.

Task Type: Select SQL Script

Command to run: Copy and paste this SQL query into the box.

```
UPDATE EmploymentAssignment
SET program = 1, [modifiedByID] = NULL, [modifiedDate] = GETDATE()
WHERE program = 0
```
