Subject: KSIS Notification: Release of Campus.2603.10 installed on February 11 included EHO attendance code fix

KSIS Contact,

Infinite Campus included a resolution in the release installed last night (2/11) to address the issue affecting the use of the EHO: Educational Enhancement Opportunity attendance code. Details for the release were provided in the previous notifications below.

Kentucky-EHO Attendance Record Duplication (SIS-194689)
The issues causing duplication of records marked with the attendance code 'EHO' have been resolved. Users can update records using the attendance code without issue.
Path: Student Information > General > Attendance

If you have additional issues related to the EHO attendance code, please submit a case to Campus Support.

Subject: KSIS Notification: Release of Campus.2603 Scheduled for February 11

KSIS Contact,

Reminder – Infinite Campus release Campus.2603 will go into production Wednesday night (2/11). Details for the release were provided in the previous notification below.

 Assigning tool rights will ensure KDE reports are available to those needing access. Report changes in this release include:

New Report - W22 Subsequent Enrollment includes the start date and start status of the subsequent enrollment for students who have withdrawn with a "W22: Moved, re-enrolled in another Kentucky public district" code.
Sunset Report – W22 Withdrawn Student confirmed a records transfer was completed but did not confirm the enrollment of the student.

 Thank you,

Crystal Darnell

KSIS Contact,

 Please be advised that KDE has confirmed the release of **Campus.2607** to start **Wednesday, March 11, at 7:00 p.m., (Central)/ 8:00 p.m. (Eastern)**. Infinite Campus will be temporarily unavailable during the update process. Please contact Lisa Keeter or DeDe Conner if you have any questions or concerns about the update schedule.

See the Kentucky release notes for state specific items and Campus.2607 for the full manifest of changes.

Please share this information with individuals in your district or office as appropriate.
Thank you!

Infinite Campus Release Highlights – Campus.2607
Kentucky Specific

Item	Description
ILPA	The ILPA school name "Phoenix Academy" was updated to "Cardinal Innovation Center" in the ILPA school list.
Preschool	A new Enrollment End Status code, W31: Withdrawn from preschool program after school/parent agreement, was added. The Preschool Enrollment Count extract now generates faster when calculating for Error 1.
Special Education	Now, when a Postsecondary Goals and Services record is created on the Kentucky Individual Education Plan, at least one Transition Services and Agency Responsibility record must be added. The Individual Education Plan 2022.2 and Private School Service Plan 2022 print formats were archived. The current print formats for these documents are KY IEP 2023 and KY PSP 2023.
State Edition	Several updates were made to the Custom Tools Publisher Custom Tools Publisher for Kentucky: • A district that has an error can now be republished without unpublishing. • A new status was added to make it visible to the user on the main page that there was an error on a district when publishing.
Transportation	Transportation 2.0 records now automatically end when the enrollment record it is tied to ends. This does not override an existing transportation record end date **REMINDER: Do not enable Transportation 2.0 in production until KDE can fully analyze the impact on funding and functionality.**

Core Product

Item	Description
Assessment	The Assessment Center score importer has been enhanced to support vertical file imports, in addition to the existing horizontal file format. Vertical files allow for one score per row with multiple rows per student, while horizontal files have one row per student containing all scores. The 'Apply to All' feature is now only visible and functional for Horizontal orientation. Additionally, unique assessment names within an assessment "family" are now required to save new or modify existing assessments. These improvements facilitate the direct import of vertical score files from national assessment vendors, eliminating the need for manual conversion..

Item	Description
Custom Forms	Users can now create and manage multiple versions of Blank and Interactive form types, allowing for better tracking and organization of form revisions. See the Custom Forms Setup article for additional information.
Insights	Insight reports for Behavior (Events by Grade, Events by Resolution, Events by Role, Events by Staff) have been updated to count distinct events instead of resolutions or students. Please note that any existing report templates created before implementing this update must be removed and recreated to reflect the updated counting method.
Messenger	Improved Mailgun email dispatch for large messenger campaigns without Campus Fields/Sub-Reports.
Scheduling	The following updates have been made to the Scheduling Board: • A new Load Setting has been added - Filter by Ad hoc. This option can be used to load specific groups of students into courses. Like other tools in the product, when an Ad hoc filter is selected, matching search results only include those students who are included in the filter. Filters of all types can be selected (query wizard, selection editor, pass-through query). When a filter is selected, the total number of students included in the filter is displayed below the filter field. The changes being made by the load only affect the students in that filter who have course requests. • When opening the active trial in the active year after the start of the school year, a red banner displays in the Scheduling Board to alert the user that they opened the active trial and they need to proceed with caution when making changes. A Section Student Detail (where available) button has been added to the Roster Update panel in the student's Walk-In Scheduler to easily access the Section Student Detail tool when updating roster-related fields. From the Walk-In Scheduler view on the student's Schedule, select a course. The Roster Update panel displays; just below the Modified By information, the Section Student Detail button displays. Clicking this opens the Section Student Detail tool, where users can adjust the student's roster details.
Security	A dropdown list called 'Require MFA for SAML Logins' has been added as an option for the 'Require Email-Based Multi-Factor Authentication Code' and 'Require Time-Based Multi-Factor Authentication from a Third Party App' authentication options in Login Security Settings. When set to Yes, users authenticating via SAML will be required to complete the email or third-party app authentication process (depending on which authentication is set in Login Security Settings).
