**To:** All State KSIS Contacts  
**Subject:** KSIS Notification: Release of Campus.2611 Scheduled for April 8

KSIS Contact,

Please be advised that KDE has confirmed the release of **Campus.2611** to start **Wednesday, April 8, at 7:00 p.m., (Central)/ 8:00 p.m. (Eastern)**. Infinite Campus will be temporarily unavailable during the update process. Please contact Lisa Keeter or DeDe Conner if you have any questions or concerns about the update schedule.

See the [Kentucky release notes](#) for state specific items and [Campus.2611](#) for the full manifest of changes. Please share this information with individuals in your district or office as appropriate.

Thank you!

**Infinite Campus Release Highlights – Campus.2611**

**Kentucky Specific**

Item	Description
<b>Attendance</b>	<p>The issues causing duplication of records marked with the attendance code “EHO” have been resolved. Users can update records using the attendance code without issue. (Currently in production)</p> <p>The <a href="#">Day Count KY Report</a> was updated to narrow records based on the calendar selection in the Campus Context Switcher. For example, when "Active Student Only" is selected, only active students within the selected calendar are reported.</p> <p>An issue with clicking the calendar icon on the Kentucky <a href="#">Attendance Profile Batch Print Report</a> editor was resolved.</p>
<b>Career Readiness</b>	<p>Two names were updated for Kentucky's list of State Course Codes on the Career Readiness tool:</p> <ul style="list-style-type: none"> <li>• The description for code 600189 changed to "Experience in Workplace Principles".</li> <li>• The description for code 901005 changed to "Experience-Based Work".</li> </ul> <p>The <a href="#">Career Readiness Report</a> description update intended for Nevada was applied in error to Kentucky in the Campus.2607 release. This has been corrected, and each state's description now accurately reflects state-specific requirements.</p>
<b>Enrollment</b>	<p>The <a href="#">Enrollment Cleanup Wizard</a> was updated to correctly modify the start date of state transportation reporting records associated with enrollments.</p>
<b>Kentucky Report Column Name Updates</b>	<p>The column names on several Kentucky reports were updated to match the following standards:</p> <ul style="list-style-type: none"> <li>• Column names start with a letter or underscore.</li> <li>• Column names do not start with the letters XML.</li> <li>• Column names can contain letters, digits, hyphens, underscores, and periods.</li> <li>• Column names cannot contain spaces.</li> </ul> <p>Updated reports include:</p> <ul style="list-style-type: none"> <li>• <a href="#">Funding Gap Audit</a></li> <li>• <a href="#">English Learners Extract</a>   EL Demographics</li> <li>• <a href="#">Transition Report</a></li> <li>• <a href="#">Student Participation</a></li> <li>• <a href="#">Safe Schools</a></li> <li>• <a href="#">Retention Report</a></li> </ul>

Item	Description
Safe Schools	Additional logic for generating Warning 1 was added so that the warning is raised when a shortened day occurs within an SSP3 out-of-school suspension period and the attendance code for any days within that period is not "S".

### Core Product

Item	Description
Academic Planning	<p>An issue was resolved where credits were being counted twice in the Progress View of Academic Planning.</p> <p>Create Course Requests were failing to function properly when Course Plan had state grade levels containing an extra zero. This has been resolved.</p> <p>An issue with a caching mechanism was causing GPA Calculation on students' Progress tabs to display inconsistently across different application servers. This issue has been resolved.</p> <p>A Course Requests issue that was related to State Grade Codes and State Grade Names not matching has been resolved.</p> <p>An enhancement has been made that allows State Credit Types to be created at the state level and then mapped by districts to local Credit Types in Credit Group Setup. This allows the management of state credit types in state-managed Academic and Graduation Programs.</p>
Assessment	The issue preventing the correct matching of school numbers during <a href="#">assessment imports</a> in State Editions has been resolved.
Campus Instruction	The <a href="#">Category Copier</a> tool in the Grade Book has been updated to improve the visual design and accessibility of the tool. Functionality of this tool has not changed. Previously, users had to click Enter twice to navigate to the next student in the <a href="#">Multi-Score</a> screen, when Rapid Scoring was turned off. This has been corrected.
Campus Parent/Student	Some translations for newer tools have been restored after being inadvertently removed in a recent case.
Classroom Integrations	The process for configuring LTI 1.3 connections has been updated to allow the following fields to be prepopulated if values exist in the Campus internal digital learning vendor system: LTI 1.3 Public Keyset URL, LTI 1.3 Login Initiation URL, LTI 1.3 Target Link URI.
Census	An issue where the <a href="#">Photo Import</a> tool would error when processing certain ZIP files has been resolved, and error messaging has been enhanced.
Cross-Site Enrollment	<p>When the home school used the <a href="#">Batch Edit</a> mode on the Attendance Entry Wizard to enter attendance data for multiple days, the serving school did not receive that attendance data for any day after a day without a Cross-Site Enrollment course. This has been corrected.</p> <p>Previously, when attendance was transferred from the serving school to the home school, or vice versa, present minutes were always set to 0, regardless of the student's actual attendance. Additionally, attendance present minutes could not be edited at the home school once transferred. Now, logic has been updated to accurately transfer present minutes based on the value recorded at the school taking attendance, regardless of the number of mapped periods involved. Home school staff can now edit the present minutes when necessary, providing greater flexibility and more accurate attendance reporting.</p> <p>See the <a href="#">Attendance Information for Cross-Site Students</a> for more information.</p> <p>Users can no longer remove the <a href="#">Cross-Site Enrollment</a> checkbox in serving school sections when roster records exist in linked home school sections. This prevents issues with grade synchronization and maintains proper linkage between serving and home school sections.</p>

Item	Description
<b>Custom</b>	<p>The UI of the Core Attribute Dictionary and Custom Attribute Dictionary tools was updated to current modern UI standards, improving usability and accessibility.</p> <p>Also, a search field has been added to both tools, allowing users to quickly find a specific attribute.</p>
<b>Enrollment</b>	<p>The End Action field is now available on the <a href="#">Enrollment History</a> editor, and has been added to the <a href="#">Enrollment History Import Wizard</a> for Records Transfer.</p>
<b>Grade Reporting</b>	<p>The <a href="#">GPA Snapshot Job</a>'s summer (June 30) trigger logic has been updated to ensure that Class Rank is calculated using information from the recently concluded school year, regardless of the current active school year</p>
<b>Messenger</b>	<p>Messages sent with no recipients now display a 'No Recipients' status in Sent Message Log 2.0.</p>
<b>Records Transfer</b>	<p>The following issues relating to the End Action Field and the Enrollment History Import Wizard have been resolved:</p> <ul style="list-style-type: none"> <li>• Missing End Action Field has been added to Enrollment History Import Wizard</li> <li>• End Action now displays on imported Enrollment History records</li> </ul> <p>End Action now prints on Enrollment History reports.</p>
<b>Scheduling</b>	<p>Alternate Course Requests can now be loaded using the <a href="#">Scheduling Board</a>. In the <a href="#">Load Settings Panel</a>, a new Maximum Number of Alternate Sections option has been added. The numeric value entered here indicates the number of alternate courses a student can be scheduled into. Once this value is entered:</p> <ul style="list-style-type: none"> <li>• Run <a href="#">Load Alternates</a> to add alternate requests to all course sections.</li> <li>• Right-click on a Department, Course, Section, or Term to add alternate requests by those options.</li> </ul> <p>On the <a href="#">Walk-In Scheduler</a>, alternate course requests are prioritized. On the Scheduling Board, those requests are attempted to be loaded in the order they are numbered (prioritized) on the Walk-In Scheduler, and will take into account the value in the Maximum Number of Alternate Sections.</p> <p>When using the <a href="#">Student Gap Scheduler</a>, selecting a student from the student search did not navigate to the Walk-In Scheduler as expected. Navigation logic has been updated to automatically redirect to the Walk-In Scheduler when a student is selected from the search results.</p> <ul style="list-style-type: none"> <li>• When there are multiple students with a schedule gap, the search panel returns a list of students in the search results. Selecting a student from that list opens the Walk-In Scheduler tool.</li> <li>• When there is only one student with a schedule gap, the Walk-In Scheduler opens immediately.</li> </ul> <p>The Start Year and End Year fields on the Course Management tool have been relabeled to <a href="#">School Start Year and School End Year</a>. The options in these fields list the school year as entered in the Label field on the School Year Setup tool. When a School Start Year of 25-26 is selected, the state code record is active on the date entered in the Start Date field of the School Year Detail. When a School End Year of 25-26 is selected, the state code record is active through the End Date entered in the End Date School Year Detail.</p> <p>Course Masters Updates</p> <p><a href="#">Course Masters</a> that use invalid state codes are now considered inactive when the active school year changes from the current school year to the next school year at the district level on the School Year Setup tool. After the active year changes, Course Masters that use an invalid state code will display the inactive state code with the text (invalid) in the state code field. These codes need to be manually changed at the district to use the updated state code provided by the state.</p> <p>When Course Master still has an invalid state code that is pushed to Courses, a validation error displays, indicating it cannot be pushed to courses because of the invalid state code.</p>

Item	Description
	When invalid state codes are linked to Course Masters in future calendars after the active year changes, the State Code field displays the invalid State Code with the text (invalid). These codes need to be manually changed at the district to use the updated state code provided by the state.
