**Subject:** KSIS Notification: Reminder Release of Campus.2639 Scheduled for October 14

KSIS Contact,

Reminder – Infinite Campus release Campus.2639 will go into production tomorrow night (10/14). Details for the release were provided in the previous notification below.

Assigning tool rights will ensure KDE reports are available to those needing access. Report changes in this release include:

- [Gifted and Talented Benchmark report](#) - added SAT, Grade 10 KSA, and Grade 11 KSA columns and updated benchmarks.

Rx Pack changes that will be included in this update.

### **Infinite Campus Release Highlights – Campus.2639**

#### **Kentucky Specific**

| Item          | Description                                                                                                                                                                                  |
|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| State Edition | An issue where certain tool rights were not synced from state to district editions for State to District Login was fixed. KDE Reports will be available but Edit Reports are still an issue. |

#### **Core Product**

| Item             | Description                                                                                                                                                                                                                                                                                                                                                                      |
|------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Attendance       | Attendance could not be entered at a student's home school when the student had a previously ended Cross-Site Enrollment (CSE) roster at a serving school. This has been corrected.<br>The attendance validation process now considers roster start and end dates, preventing inactive serving school enrollments from incorrectly blocking attendance entry at the home school. |
| Learner Planning | An issue where the day calculation was not working correctly in certain special ed plans was fixed.                                                                                                                                                                                                                                                                              |
| State Edition    | The ability to assign RWAD access to users via the State to District Login User Group tool rights editor has been added for: <ul style="list-style-type: none"><li>• Filter Designer</li><li>• Data Viewer</li><li>• Pivot Designer</li><li>• Letter Designer</li></ul>                                                                                                          |

**Subject:** KSIS Notification: Release of Campus.2639 Scheduled for October 14

KSIS Contact,

Please be advised that KDE has confirmed the release of **Campus.2639** to start **Wednesday, October 14, at 7:00 p.m., (Central)/ 8:00 p.m. (Eastern)**. Infinite Campus will be temporarily unavailable during the update process. Please contact Lisa Keeter or Crystal Darnell if you have any questions or concerns about the update schedule.

See the [Kentucky release notes](#) for state specific items and [Campus.2639](#) for the full manifest of changes.

Please share this information with individuals in your district or office as appropriate.

*Thank you!*

### Infinite Campus Release Highlights – Campus.2639

#### Kentucky Specific

| Item                      | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Attendance</b>         | An issue in which students not in the PAR: Partial Day Attendance Group were incorrectly reporting in the Partial Day column of the Kentucky <a href="#">Funding Gap Audit</a> report was fixed.                                                                                                                                                                                                                                                                                                            |
| <b>Graduation (HB307)</b> | New State Seals were added to the <a href="#">Graduation</a> tool for Proactive Postsecondary Admissions Program (HB307) reporting. New State Seals include: 03: Governor's Scholars Program and 04: Kentucky Governor's School. If parent or eligible student opts in to participate, Graduates of Governors Scholars Program, Governor's School for the Arts or Governor's School for Entrepreneurs will be included in the files to universities. These State Seals can also be included on transcripts. |
| <b>TEDS</b>               | The file names of the Kentucky <a href="#">TEDS Report</a> were updated based on the selected Extract Type: TEDSe.txt or TEDSe.xml for Enrollment and TEDSd.txt or TEDSd.xml for Demographics. The default Date Range on the report was also updated to 07/01 to 06/30 of the current school year.                                                                                                                                                                                                          |
| <b>Transportation</b>     | An update was made to the Kentucky <a href="#">Transportation 2.0</a> conversion script to address several issues.<br><b>REMINDER: Do not enable Transportation 2.0 until KDE has confirmed it is ready. There are still issues that impact SAAR.</b>                                                                                                                                                                                                                                                       |

#### Core Product

| Item                           | Description                                                                                                                                                                                                                                                                                                                                              |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Assessment</b>              | The <a href="#">Assessment Center</a> has been updated to properly read legacy mappings. This resolves an issue where the tool was unable to read old mappings following the Campus.2623 release.                                                                                                                                                        |
| <b>Assessment</b>              | Updated <a href="#">Assessment Center</a> logic to save state edition scores only for years in which the student has an active enrollment record. When a specific-year override is applied, the system now excludes test scores from years with no corresponding student enrollment. This update applies to both manual score updates and Prism resyncs. |
| <b>Attendance</b>              | Additional improvements have been made to the performance of the <a href="#">Attendance</a> tool in Instruction, especially for users of Cross-Site Enrollment.                                                                                                                                                                                          |
| <b>Census</b>                  | The <a href="#">Census by Birth Date Report</a> has been fixed.                                                                                                                                                                                                                                                                                          |
| <b>Census</b>                  | The <a href="#">address search functionality</a> now returns results in the correct order. Extra spacing, or "white space" in address text, may continue to cause ordering issues.                                                                                                                                                                       |
| <b>Course or Section Setup</b> | State Report Exclude option for Courses, Course Masters, Sections added as hidden by default. KDE requests that this option not be unhidden due to the impact on state reporting.                                                                                                                                                                        |

| Item                    | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Course or Section Setup | <p>As a result of an earlier fix, some checkboxes on the Course and Course Master tools were erroneously marked, including Attendance, Active, Requestable, Required, and Transcript. This issue has been fixed, and data has been restored.</p> <p><b>KDE discovered that we still are being impacted. When creating a new Course Master, Attendance, Active, Requestable, Required, and Transcript are automatically checked. They can be unchecked, but caution is needed until this is resolved.</b></p>                                                                                                                                                                                                                                                  |
| eTranscripts            | Updated the <a href="#">eTranscript Batch</a> tool to display only students who are eligible for eTranscript generation. Students who do not have a primary enrollment at the selected school on the Enrollment Effective Date are now excluded from search results and generated output. This change aligns search results with eTranscript eligibility requirements and ensures that only a student's current school can submit eTranscripts.                                                                                                                                                                                                                                                                                                               |
| Enrollment              | Multiple states were seeing extra scroll bars displaying in the Enrollment tool. The UI has been updated to remove unnecessary scroll bars.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Messenger               | A Message Status filter has been added to the <a href="#">Sent Message Log 2.0</a> filtering options, allowing users to filter the message list by sent, canceled, and error statuses;                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Messenger               | <p>This enhancement will improve the user experience for viewing the status of recently sent messages on the Messenger 2.0 page. The Upcoming Messages section has been renamed to <a href="#">Message Activity</a>, and a new Sent tab has been added, allowing users to view sent messages over the last seven days. If users have tool rights for Sent Message Log 2.0, a link will be available to navigate and further troubleshoot campaign information.</p> <p>The Sent tab will display the following details:</p> <ul style="list-style-type: none"> <li>• Subject</li> <li>• Message ID</li> <li>• Status</li> <li>• Sent Date/Time</li> <li>• Created By</li> <li>• Total Calendars</li> <li>• Recipient Group(s)</li> </ul> <p>Delivery Modes</p> |
| Messenger               | The Scheduled tab of the <a href="#">Message Activity</a> card has been updated with a grid component to concisely display message information for messages scheduled for delivery. The grid provides users with more consumable information and a more convenient method to edit or cancel a message series.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Messenger               | The Upcoming Messages in Messenger 2.0 has been replaced with <a href="#">Message Activity</a> , which adds message information, makes message cancellation features easier to access, and includes a Sent tab that shows messages sent in the last seven days. Additionally, a new shared filter component has been added to the In Progress tab, providing users options to filter the list by My/All Messages, Created By, Subject, Status, and Calendar.                                                                                                                                                                                                                                                                                                  |
| Records Transfer        | An issue related to calendar rights has been resolved in which persons with multiple accounts were not receiving records transfer alerts for the correct students.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Records Transfer        | Districts for which a default transcript format was already being sent during the records transfer process were receiving a message prompting them to specify a default transcript in the Report Setup Tool. Because of this, districts were trying to set up unnecessary configurations to resolve the message. This issue has been resolved so that the message does not appear for these districts.                                                                                                                                                                                                                                                                                                                                                        |
| Scheduling              | <a href="#">Reports</a> that include the start and end periods are now sorted by the sequence value.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Scheduling              | Courses with a future drop date are no longer greyed out on the <a href="#">Walk-in Scheduler</a> until the future date occurs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| Item       | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Scheduling | Uploading a document on the <a href="#">Walk-in Scheduler</a> no longer requires users to have read rights to the <a href="#">Daily Health Log</a> .                                                                                                                                                                                                                                                                                                                                                                                       |
| Scheduling | The <a href="#">Walk-in Scheduler</a> has been updated to address an issue in which courses with identical section placements were inconsistently displayed across multiple period schedules. The Walk-In Scheduler now applies display logic more consistently across period schedules, ensuring that courses configured with the same section placements are presented uniformly throughout the schedule view.<br>The Print Current View of the schedule report lists the courses in each period. This was not updated with this change. |
| Scheduling | The dates a student dropped a course were off by one day when viewed in <a href="#">Requests &amp; Rosters</a> and on the student's schedule. This has been corrected.                                                                                                                                                                                                                                                                                                                                                                     |
| Scheduling | <a href="#">Section Rosters</a> are now sorted in student last name, first name order.                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Scheduling | Interdistrict participation for <a href="#">Cross-Site Enrollment</a> (CSE) is now available for districts in all states that choose to enable CSE. KY will not enable interdistrict CSE until the impact on attendance data impacting SAAR is addressed.                                                                                                                                                                                                                                                                                  |
| Security   | Accessibility fixes have been made to the parent and student portal pages, including the login, password change, and email confirmation pages. On the parent/student login page, the "There are no district announcements" message now has improved contrast for better visibility. The header and main content sections of pages where users are prompted to change their password or add an email have been marked up with HTML ` <header>` and `<main>` tags to help screen readers navigate them more effectively.</main></header>     |
