School Report Card – SRC Review Period Updates

The School Report Card Secure Portal School Safety Review window has been extended through Aug. 20 to allow districts additional time to complete their review. Districts should remember to indicate completion of this work using the Approval tool in the School Report Card (SRC) Secure Portal. The site will not be available to districts and schools on Aug. 12 but will reopen Aug. 13.The next round of SRC data collection and review has been delayed. It will not open to districts on Tuesday, Aug. 12 as scheduled. KDE is working with the SRC vendor, AnLar, to address ongoing issues. KDE made the decision to delay until it can be confirmed issues are resolved and data has been loaded as expected in the Secure Portal. KDE must close the portal to districts to complete this review on Aug. 12. KDE will send another communication when the Collection Tool and Preview Tool (Overview, Education Opportunity and School Safety) data entry and review open to districts. As indicated above, the School Safety domain will re-open on Aug. 13 for review and approval. The release of the Collection, Preview and Approval tools for the Overview and the Educational Opportunity domains may be later this week or next. SRC and district assessment coordinator (DAC) contacts will be notified as soon as the site is open.

Districts will have through Sept. 19 to enter and review data in the SRC Portal. CTE and Transition to Adult Life will open mid-Sept. for district review. The initial public release is planned for early October without assessment and accountability data. The full SRC public release, including all data, is planned for mid-to-late November.

The School Report Card Resources webpage will continue to be used as a central repository for communications and resources. The SRC timeline, resources and all SRC communications will continue to be posted to this webpage.
