

School Report Card – SRC Review/Approval Reminder

The [School Report Card \(SRC\) Portal](#) Preview and Approval tools are open for review and approval of School Safety data. Safe Schools administrators must complete their review and, at minimum, approve at the district level by Aug. 12.

The Overview and Educational Opportunity domains will open on Aug. 12. As districts review the data, they should flag any issues with the displayed information and provide a detailed explanation, so the Kentucky Department of Education (KDE) has what it needs to research the concern. Districts must approve these domains in the Approval tool by Sept. 25.

The Collection tool remains open for district data entry of [Collector Items](#); schools can enter data into the Collection tool; districts can add superintendent messages and track school-level collection and approval statuses. Please note: the School Information collection option is new this year and includes a new field for updating prior-year principal, if different than the current-year principal. New year, districts can enter data or make updates to Collection data directly in the appropriate domain of the Preview tool.

User Guides are available to assist with how to use the [Preview tool](#) to review and flag data; the Approval tool for [reviewing flags](#) and [approving domains](#), and the Collection Tool to [submit collection data](#) (through forms by data element or in batch) and [submit superintendent messages](#). These user guides are available by selecting the SRC Portal Help tool and on the [SRC Resources webpage](#).

The Career and Technical Education and Transition to Adult Life domains will not open until mid-September.

The [School Report Card Resources webpage](#) continues to be used as a central repository for communications and resources. The SRC timeline, KDE resources, AnLar user guides, and all SRC communications will continue to be available from this webpage.
