

School Report Card – Portal Closing

This is the last week that the [School Report Card Secure Portal](#) will be open for school and district data entry, review and approvals. Please ensure this work is completed so the data in the 2025-2026 School Report Card (SRC) highlights your schools and district correctly.

Key dates:

- Oct. 1 – The signed School Profile Report should be available in the local board office.
- Oct. 2 – The [School Report Card Secure Portal](#) will close. This was originally scheduled to close on Sept. 25 but was extended to allow an additional week for review, approvals and data entry.
- Oct. 13 – At 8 a.m. ET, the district embargo period will open. Authorized users will be able to see data previously verified through the School Report Card Portal and on quality control day for their school and districts. Those with access will be able to see their own data and statewide data.
- Oct. 13 – 1 p.m. ET, the media embargo will begin.
- Oct. 15 – 8 a.m. ET, the 2025-2026 School Report Card Dashboard should be open to the public.

As a reminder, there are requirements for posting and sharing the annual School Report Card. These are detailed in the [School/District Requirements for Sharing SRC and School Profile Reports document](#) on the [SRC Resources webpage](#). If the SRC has been previously posted to school and district webpages, please be sure to verify the link is directed to 2025-2026 data.
